

Prepared by the U.S. Army Topographic Command (KCLD), Washington, D.C. Compiled in 1959 by photogrammetric methods and from United States quadrangles 1:24,000, 1:25,000, 1:48,000, 1:50,000, and 1:62,500, 1927-57. Planimetry revised in part from aerial photographs taken 1944-54. Map field checked 1959. Revised by the U.S. Geological Survey 1969.

Location of geodetic control established by government agencies is shown on corresponding 1:250,000-scale Geodetic Control Diagram

GRID ZONE DESIGNATION

11S

LANDMARK POINT: RIPLEY

1. Read letters identifying 300,000 meter square in which the point lies.
2. Locate from VERTICAL grid line to LEFT of point and read LARGE figure labeling the line either in the top or bottom margin, or on the line itself.
3. Estimate tenths from grid line to point.
4. Locate from HORIZONTAL grid line BELOW point and read LARGE figure labeling the line either in the left or right margin, or on the line itself.
5. Estimate tenths from grid line to point.
6. Combine figures in order to give the point's location.
