Feet	Meters
1	3048
2	6096
3	9144
4	12192
5	15240
6	18288
7	21336
8	24384
9	27432
10	30480

To convert feet to meters  
multiply by 3.048  
To convert meters to feet  
multiply by 3.2808

1. Dryland
2. Wetlands (May be partially submerged at mean high tide)
3. Exposed at mean low tide

Produced by the United States Geological Survey and the National Ocean Service  
Control by USGS and NOS/NODIA  
Orthophotomaps prepared by Geological Survey from aerial photographs taken April 18, 1974. Topography by planimetric surveys 1957; revised from aerial photographs taken 1974. Field checked 1975. Map edited 1979  
Supersedes topographic map dated 1967  
Bathymetry compiled by the National Ocean Service from tide-coordinated hydrographic surveys  
Soundings compiled from NOS 11509 and 11512  
This information is not intended for navigational purposes  
Mean lower low water (dotted) line and mean high water (solid) line compiled by NOS from tide-coordinated aerial photographs  
Apparent shoreline (outer edge of vegetation) shown by photogrammetry  
Projection and 10,000-foot grid ticks: Georgia coordinate system east zone (Transverse Mercator)  
1:000 meter Universal Transverse Mercator grid, zone 17  
1927 North American Datum  
To place on the predicted North American Datum 1983, move the projection lines 17 meters south and 17 meters west as shown by dashed corner ticks  
There may be private inholdings within the boundaries of the National or State reservations shown on this map
