

PRODUCED BY THE U. S. GEOLOGICAL SURVEY
 Base map prepared by Defense Mapping Agency by photogrammetric methods and from 1:24,000, 1:62,500 and 1:125,000-scale maps dated 1925-1951. Field checked 1954 and 1955. Revised by the U.S. Geological Survey from aerial photographs taken 1976 and 1978 and other source data. Revised information not field checked. Map edited 1981.
 Transverse Mercator Projection, 10,000-meter Universal Transverse Mercator grid, zone 12, 100,000-foot grid ticks based on Idaho coordinate system, central and east zones, 1927 North American Datum. To place on the predicted North American Datum 1983, move the projection lines 13 meters north and 68 meters east.
 Location of geodetic control established by government agencies is shown on corresponding 1:250,000-scale Geodetic Control Diagram.
 There may be private inholdings within the boundaries of the National or State reservations shown on this map.

1. Read letters identifying 100,000-meter squares in which the point lies.
 2. Locate first VERTICAL grid line to LEFT of point and read LARGE figure labeling the line either in the top or bottom margin, or on the line itself.
 3. Locate first HORIZONTAL grid line below point and read LARGE figure labeling the line either in the left or right margin, or on the line itself.
 Estimate tenths from grid line to point.

SAMPLE REFERENCE:
 If reporting beyond 10" in any direction, prefix Grid Zone Designation, etc.
 example: 4770000
